Career Objective

Seeking a challenging technical role in the garment industry to apply and strengthen my experience in pattern development, garment construction, sample development, fit and measurement. Aiming to build broader garment technical expertise while contributing to product quality, meeting buyer expectations and quality standards, and supporting the delivery of well-developed, technically sound garments.

Technical & Computer Skills

- **Gerber AccuMark / PDS:** Professional experience in pattern development, modification and grading.
- **CLO 3D:** Practical experience in 3D garment visualization, pattern checking and product-development support.
- **Adobe Photoshop:** Experienced in image editing and basic design-related work.
- **Microsoft Office:** Proficient in MS Word, Excel and day-to-day office applications.
- **Email & Digital Communication:** Professional email communication, file handling and digital documentation.
- **Computer Proficiency:** Strong practical experience with Windows, software applications, internet-based tools and digital workflows.
- **AI-Assisted Digital Workflow:** Practical use of AI-enabled tools to improve documentation, information processing and repetitive-task efficiency.
